

# GUARDSPRO

The Best-In-Class Security Guard Management Software.  
For Security Companies And Guards.

## Modern Back-Office Dashboard Designed To Optimize Communication Flow

The ultra-modern guard tour solution - GuardsPro is powered by a dynamic Back-Office Dashboard that is designed to streamline the communication flow throughout your private patrol company. It is highly available and the 256-bit encryption with a secure layer ensures bank-level safety of your confidential data.

### Dynamic

Manage your security guards and clients from a single platform.

### Secure

256-bit encryption with a secure layer to protect your data.

### Highly Available

Minimum downtime assures a high level of operational performance.

### Interactive

Access and share live reports, schedules, and more from multiple devices.

Simplify Your Security Patrol Operations With Back-Office Dashboard Features.

Manage Client Profiles

Add multiple client profiles with multiple post sites. You can create detailed profiles and save all the important contact information in one place.

Manage Guard Profiles

Add detailed security guard profiles and licenses to manage important information on a single platform. Get notified when the licenses are about to expire.

Live Tracker

GuardsPro Live Tracker allows you to pinpoint the exact location of your guards, enabling you to track their on-site presence and live movement.

Integrated Dispatcher

Dispatchers can attend dispatch calls coming in from multiple sources, take appropriate action, assign closest security guards dispatch tickets, and track them live.

In-App Check-In/Out:

GuardsPro allows your guards to easily check-in/out of post sites using the mobile app and do so much more. You get notified of all updates in real-time.

Real-Time Reporting

Get automatic notifications about the reports submitted by the security officers from their post sites. Also, easily view all the reports from your dashboard.

Incident Overview

Stay updated with detailed incident reports for each individual site. Check the frequency of incidents right from the back-office dashboard.

Attendance Overview

Get multiple live notifications right within the dashboard. Find out when the guards confirm shifts, clock in/out, pick up open shifts, and more.

Time Clock

Eliminate error in timesheets and bring accuracy to the payroll process with GuardsPro's integrated security guard time clock.

Messenger

A secure messenger that allows guards and admins to connect through multimedia messaging. It works with all the GuardsPro products.

Payroll

Automate your payroll process - generate and export payroll reports to Quickbooks, Gusto, ADP Workforce, and Paychex with GuardsPro payroll integrations.

Scheduler

Schedule for up to eight weeks in advance along with attendance reports, open shifts, swap shifts, shift status, and more.
